

Coniferous forest | 0-15 cm | soil FTIR (simulated)

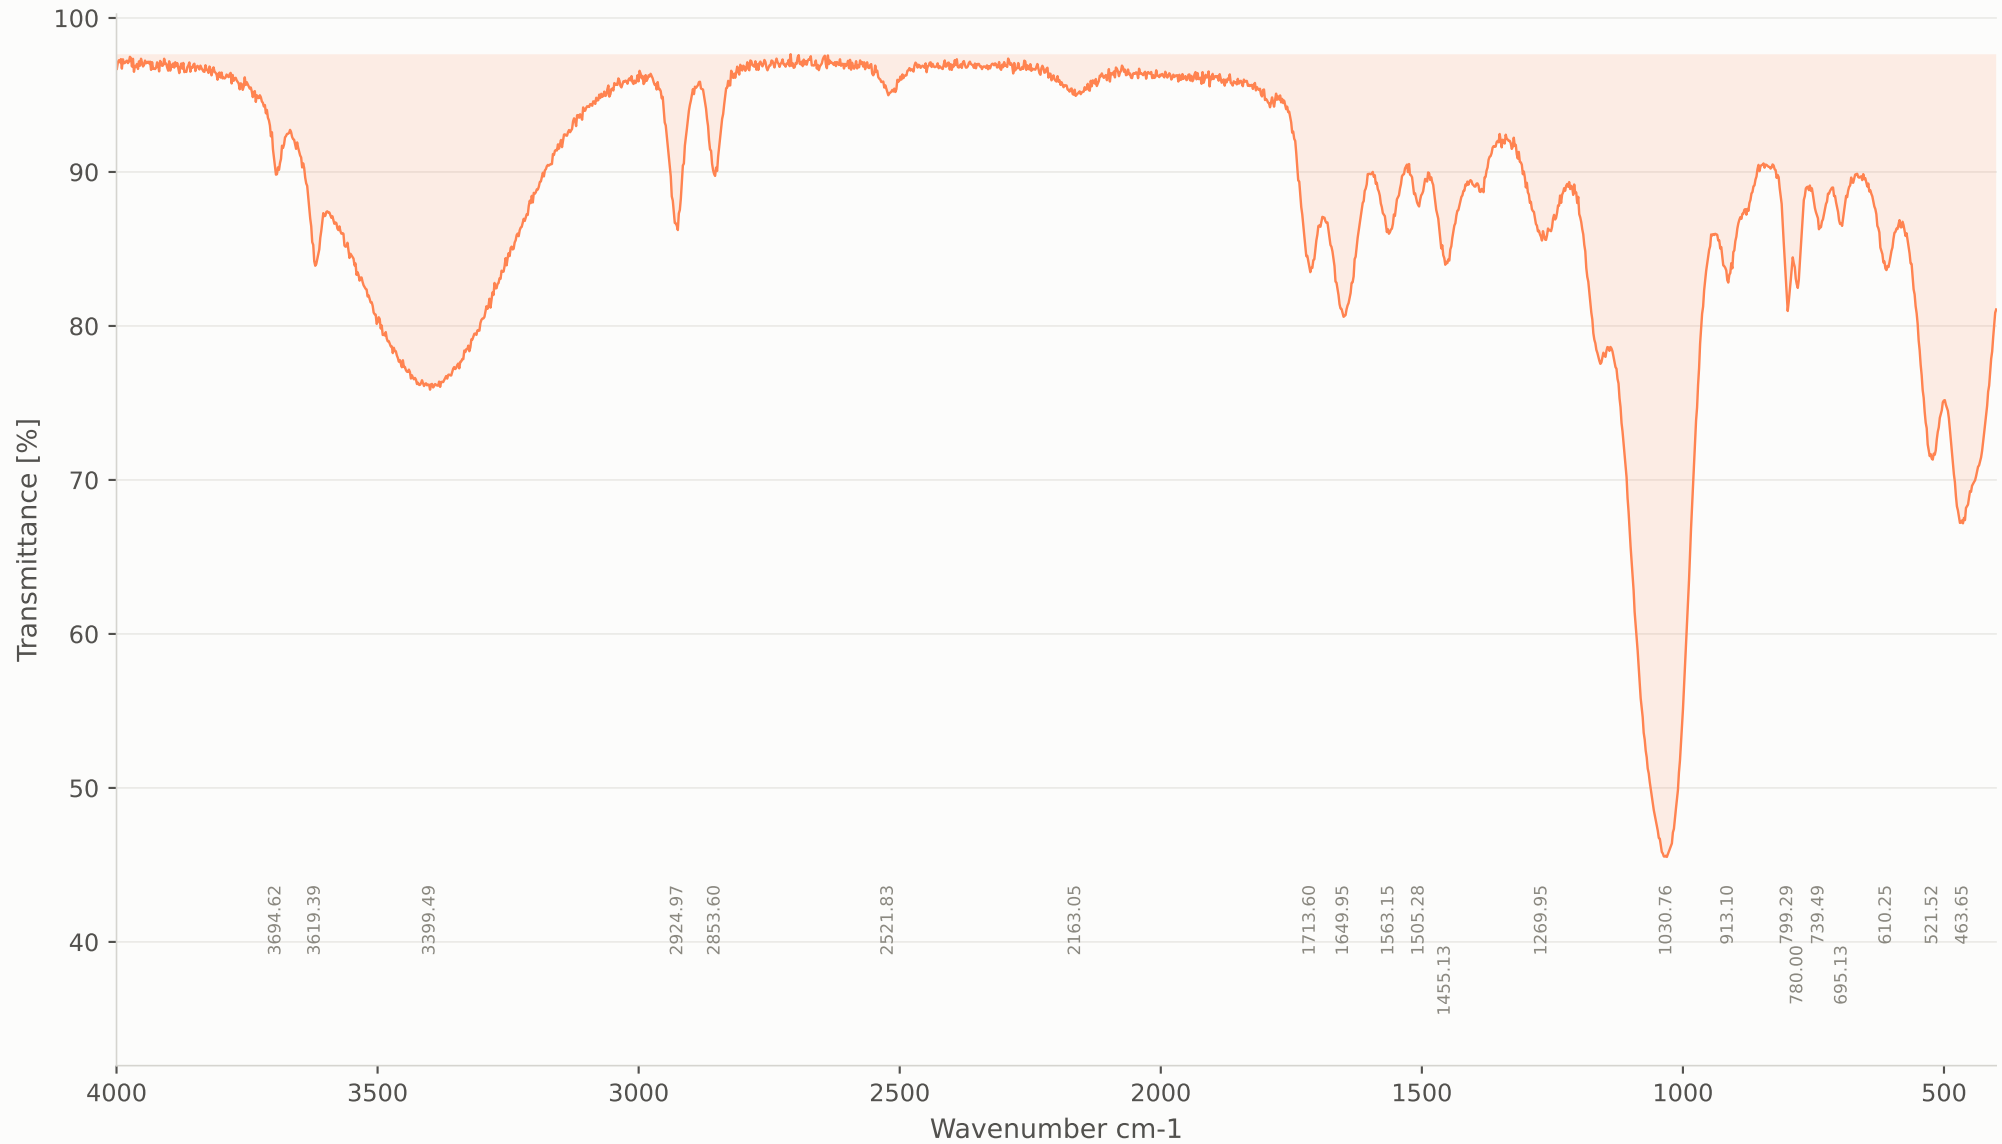

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Coniferous forest | 15-30 cm | soil FTIR (simulated)

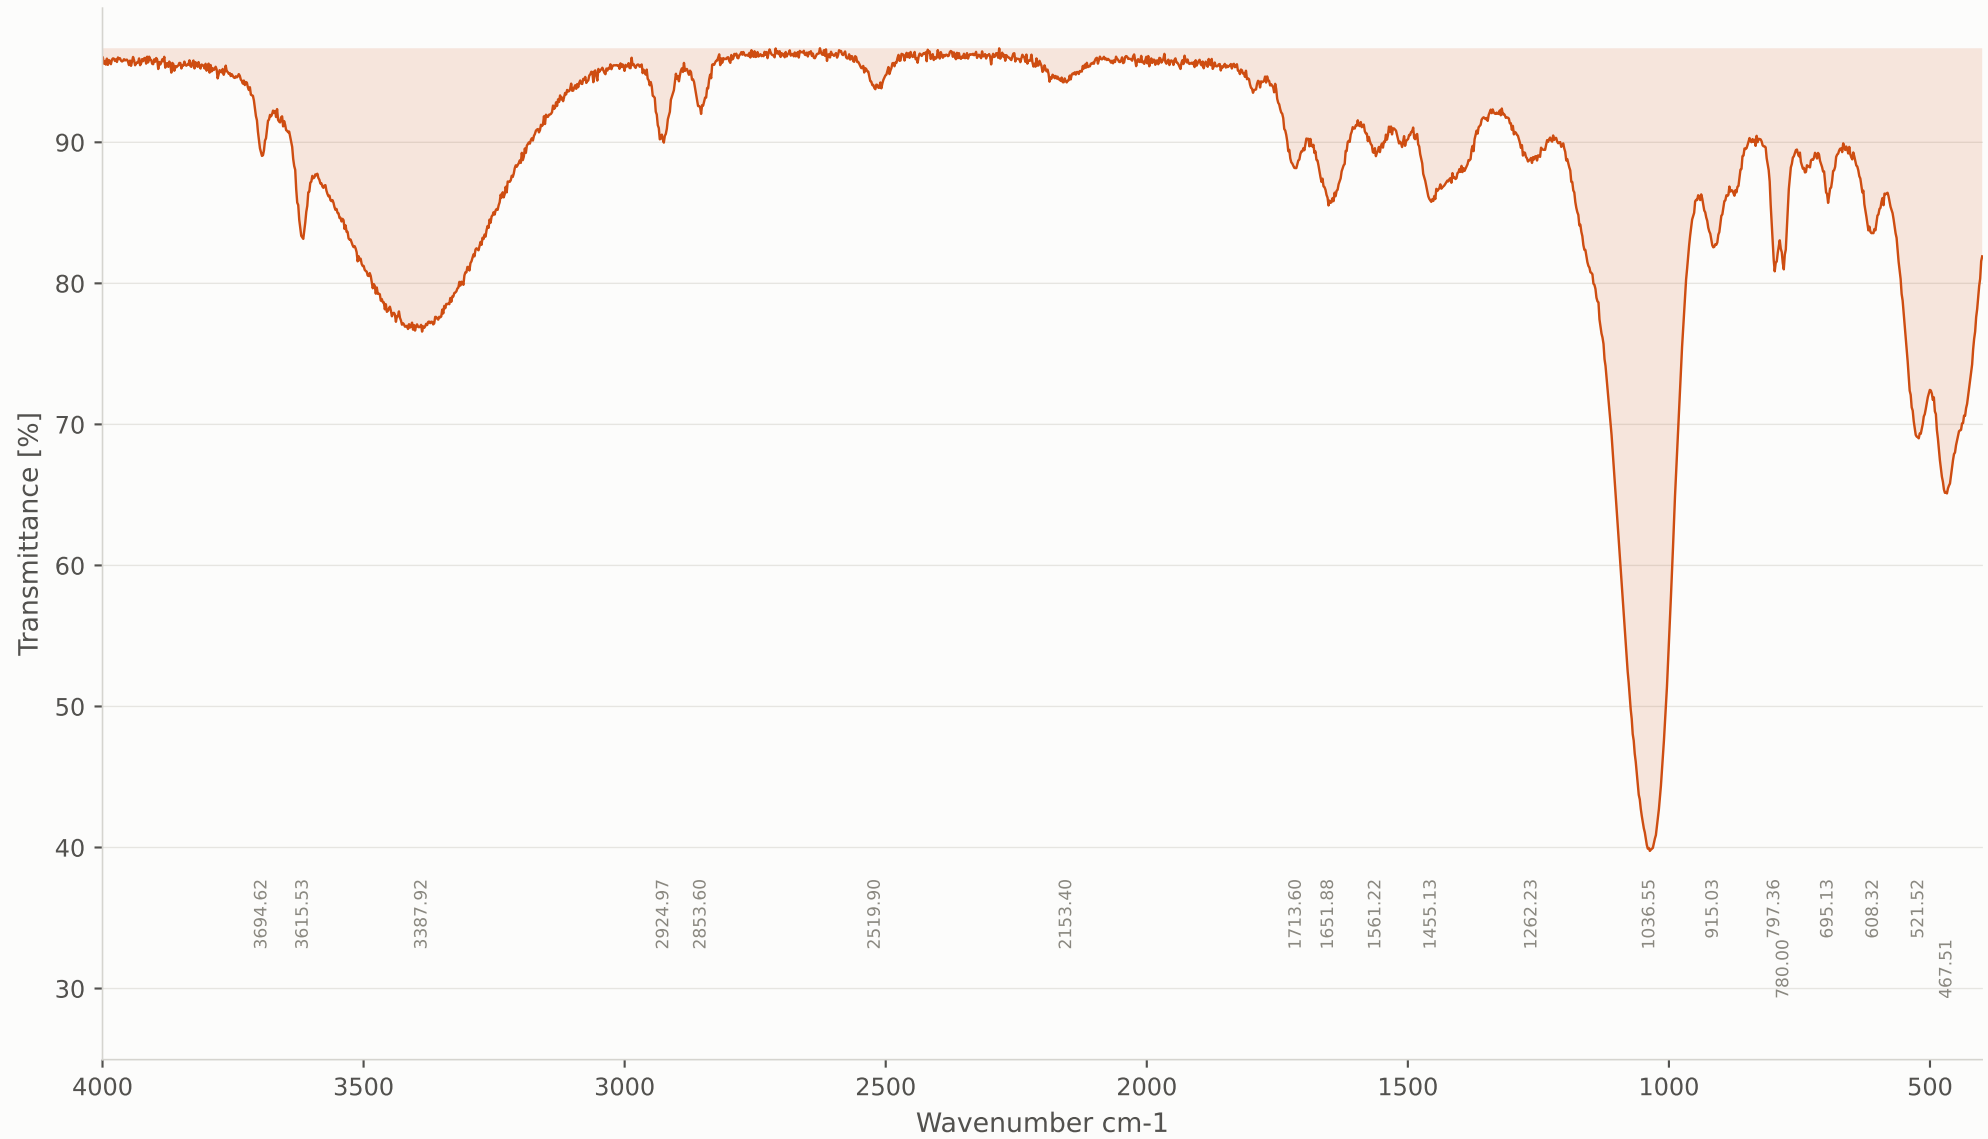

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Grazing land | 0-15 cm | soil FTIR (simulated)

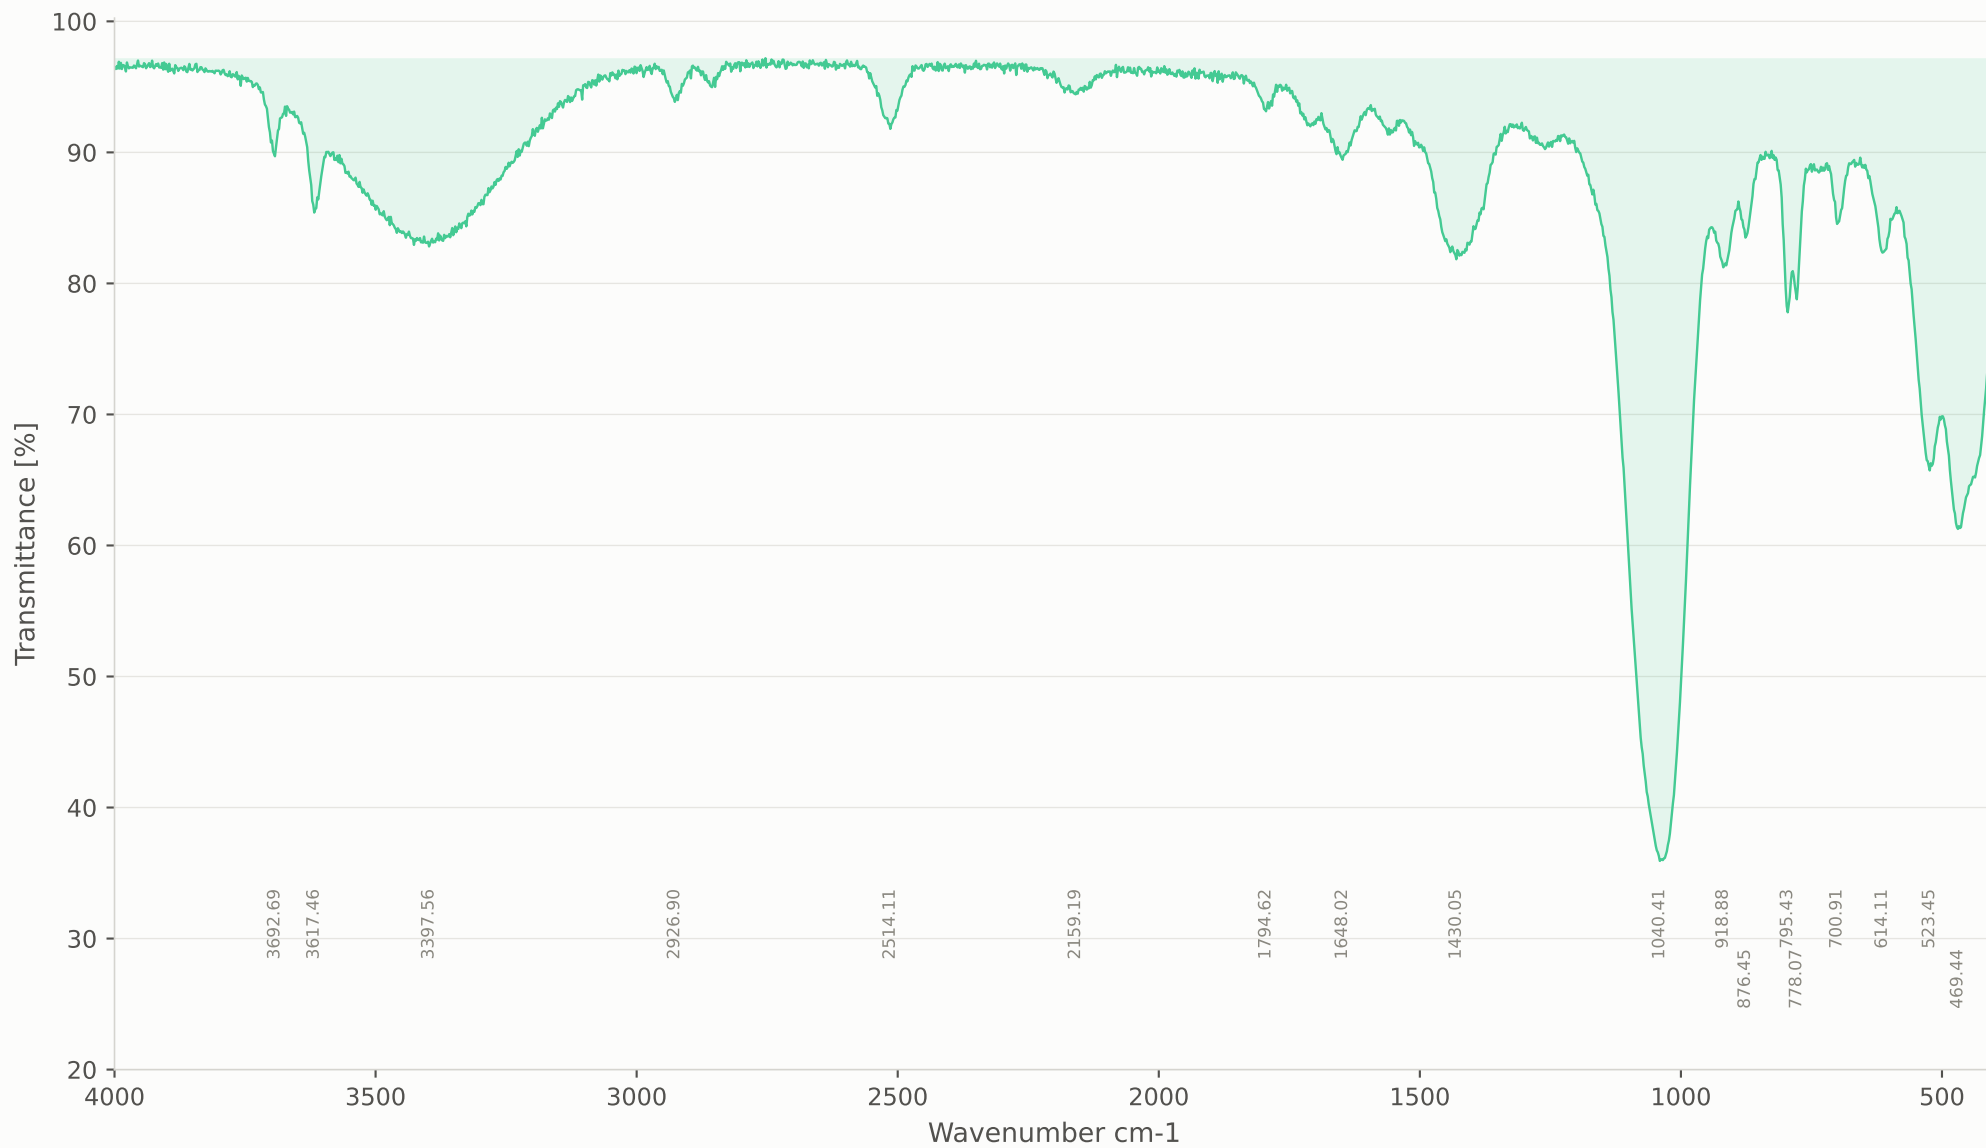

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Grazing land | 15-30 cm | soil FTIR (simulated)

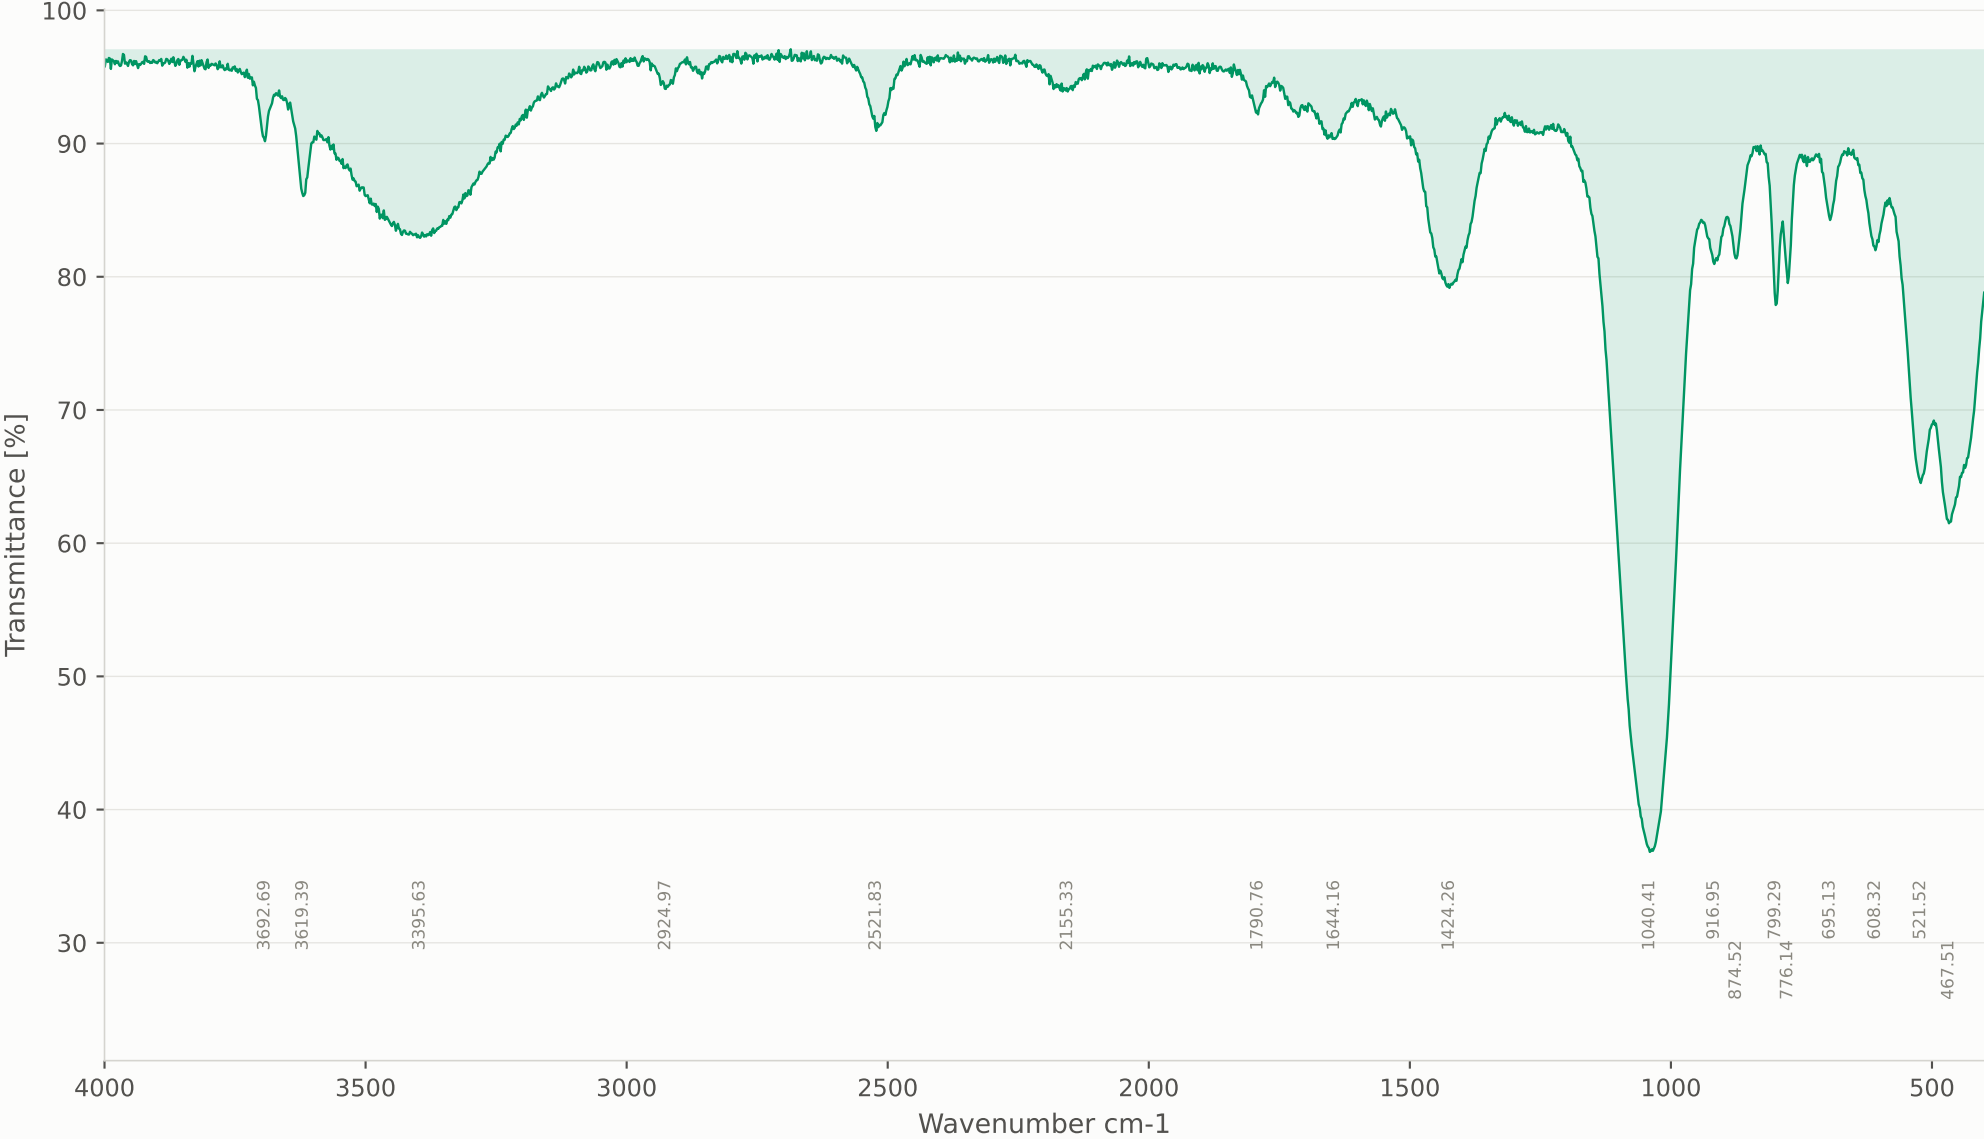

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Wasteland | 0-15 cm | soil FTIR (simulated)

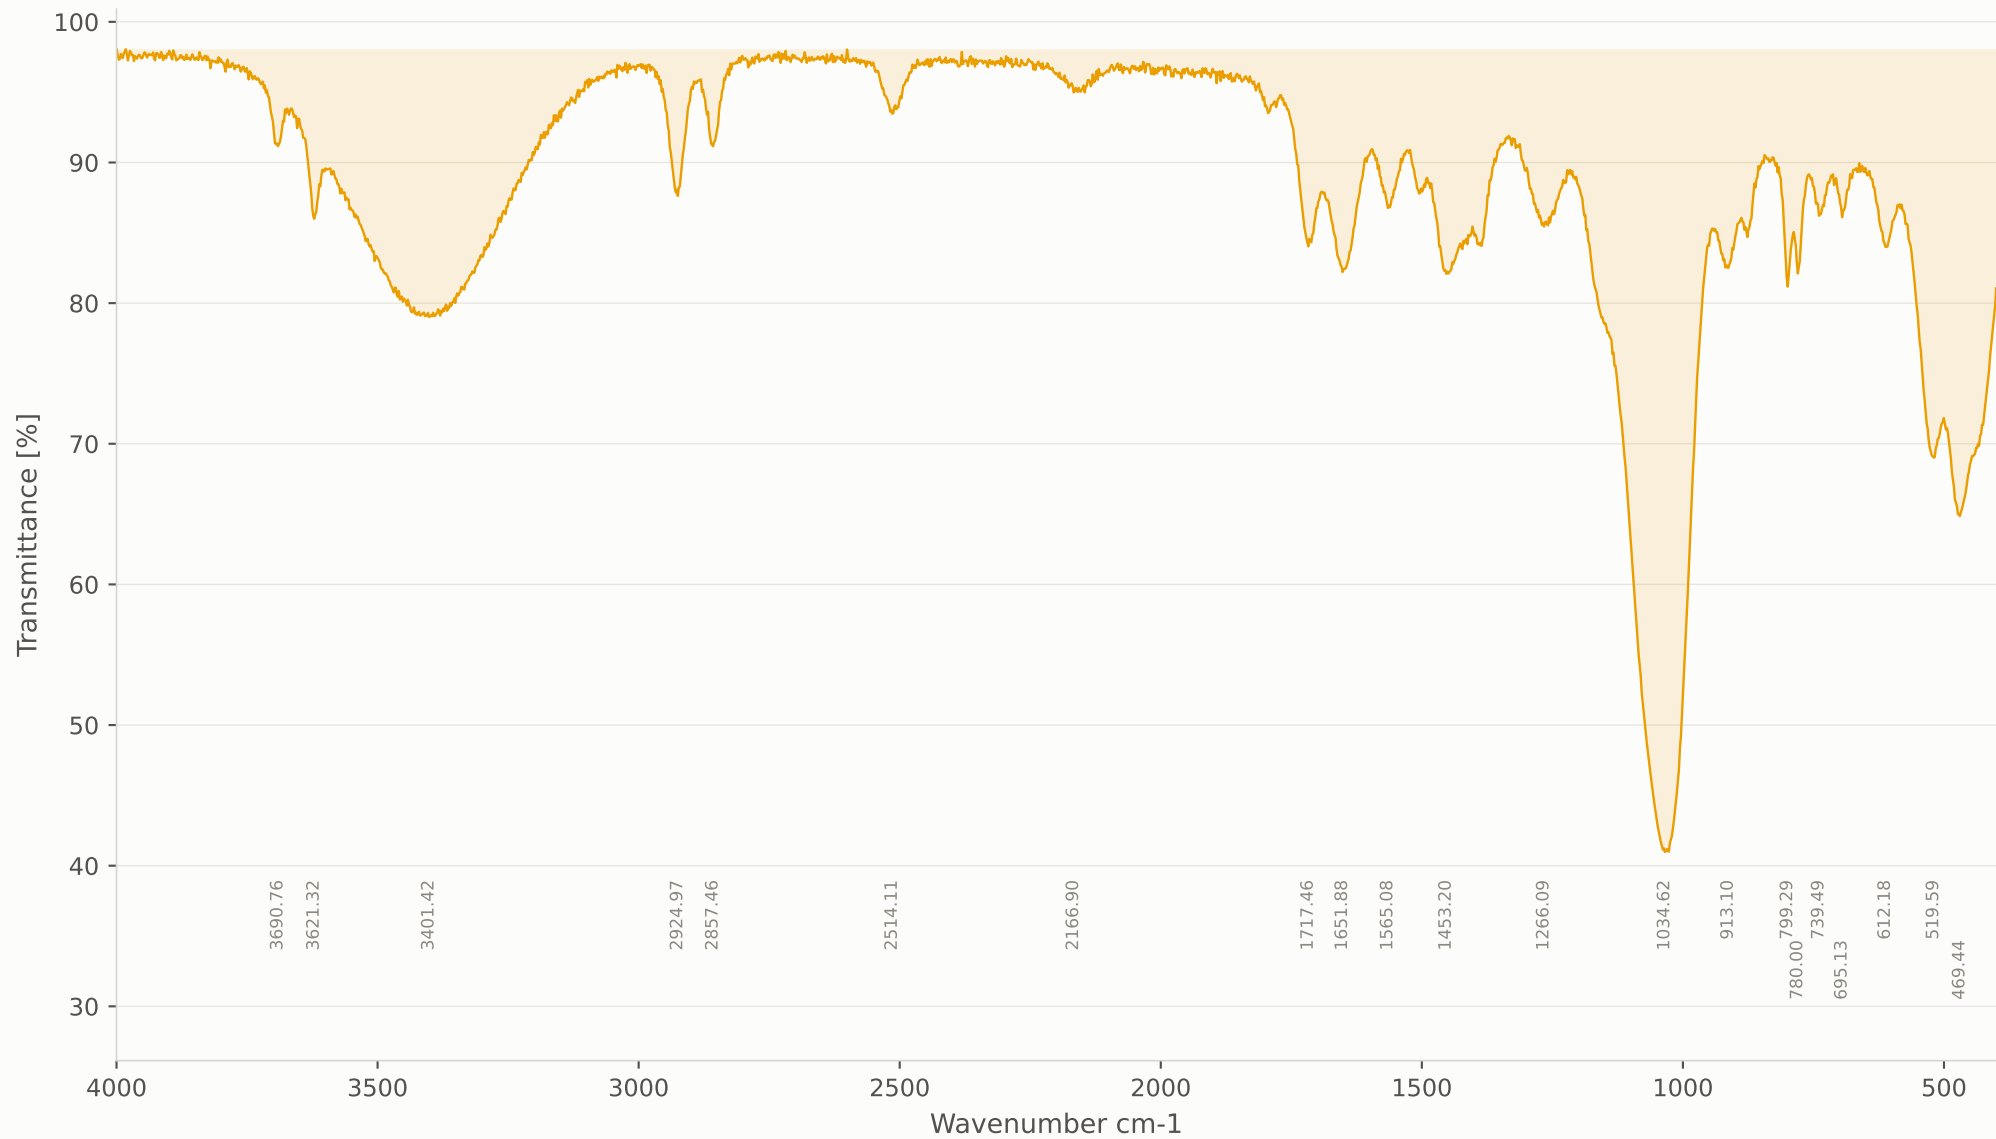

Simulated spectrum - generated from the band model in src/band_model.py. Not measured data.

Wasteland | 15-30 cm | soil FTIR (simulated)

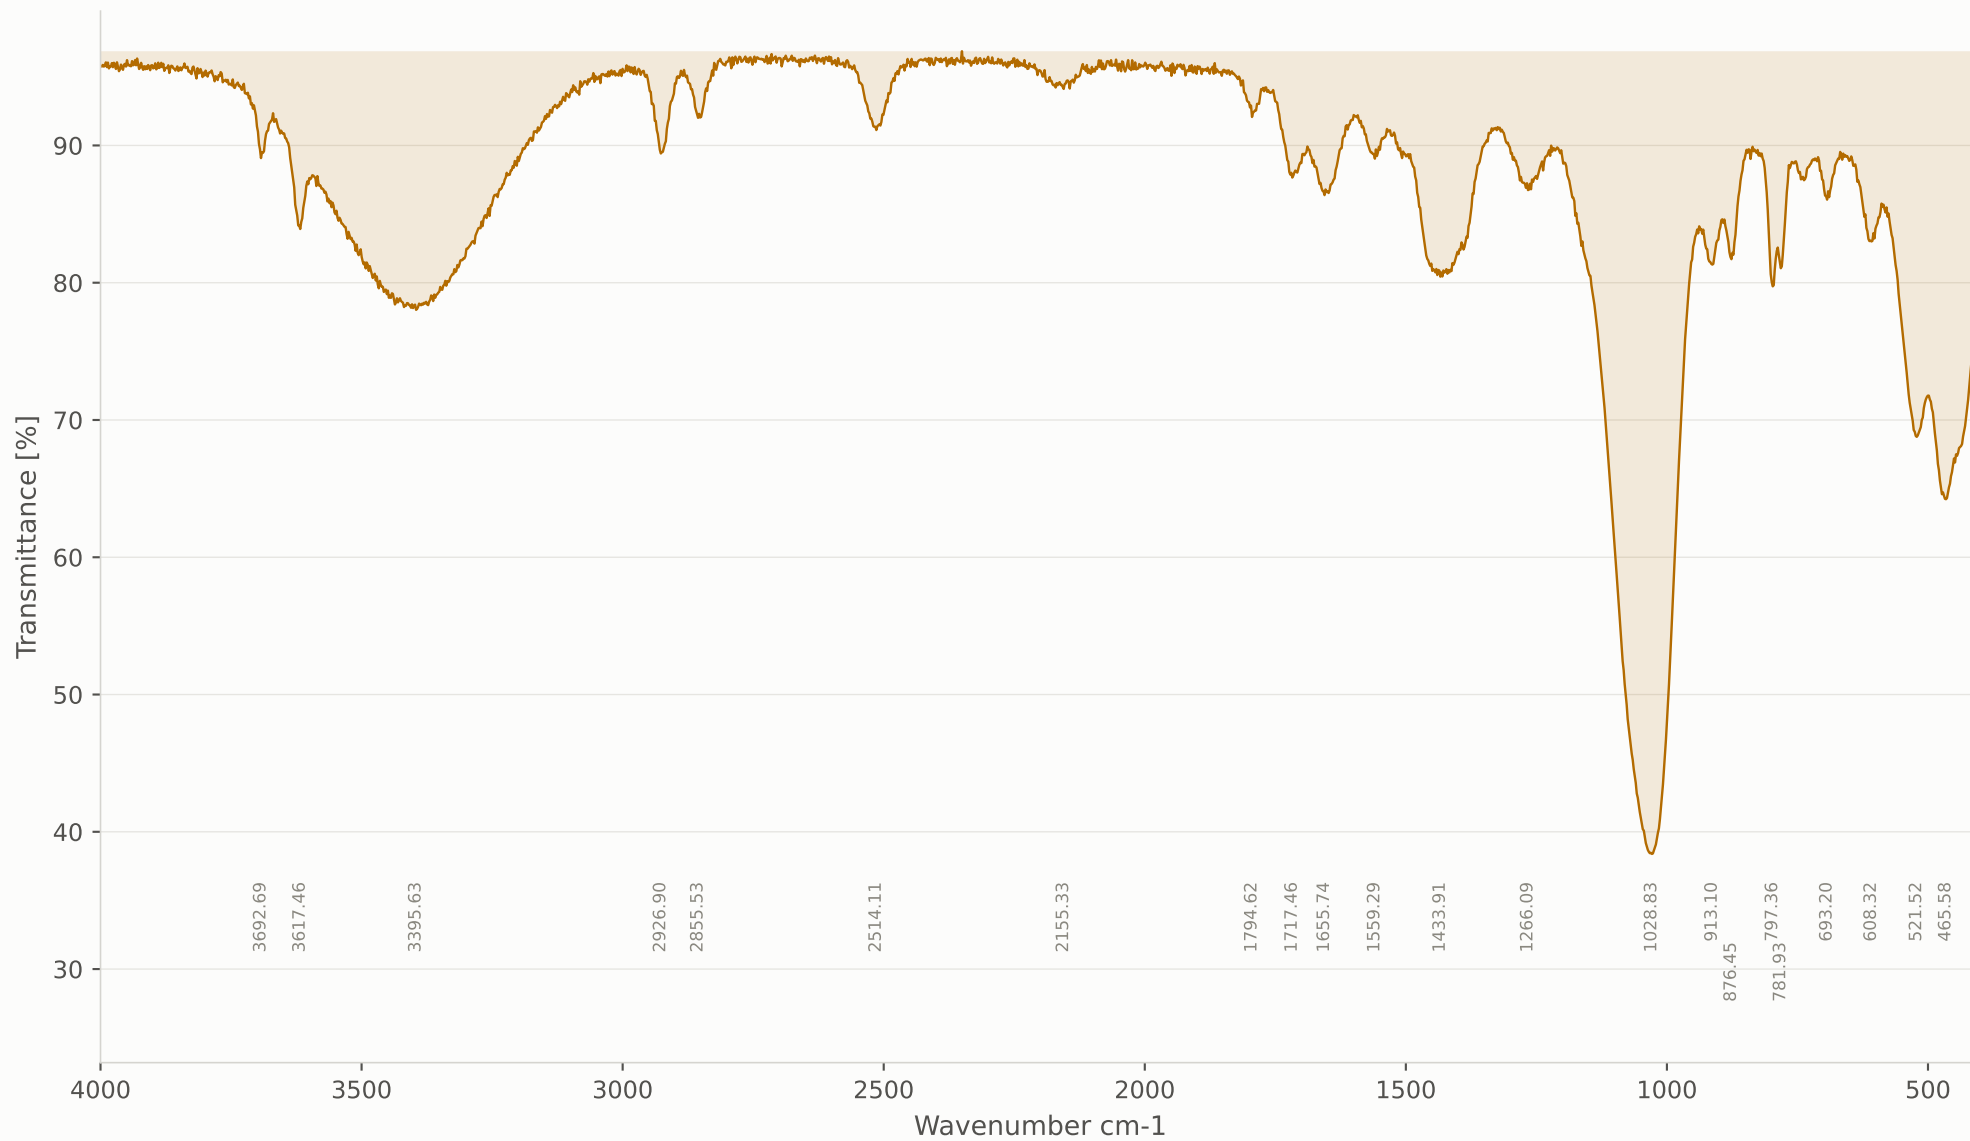

Simulated spectrum - generated from the band model in src/band_model.py. Not measured data.

Apple orchard | 0-15 cm | soil FTIR (simulated)

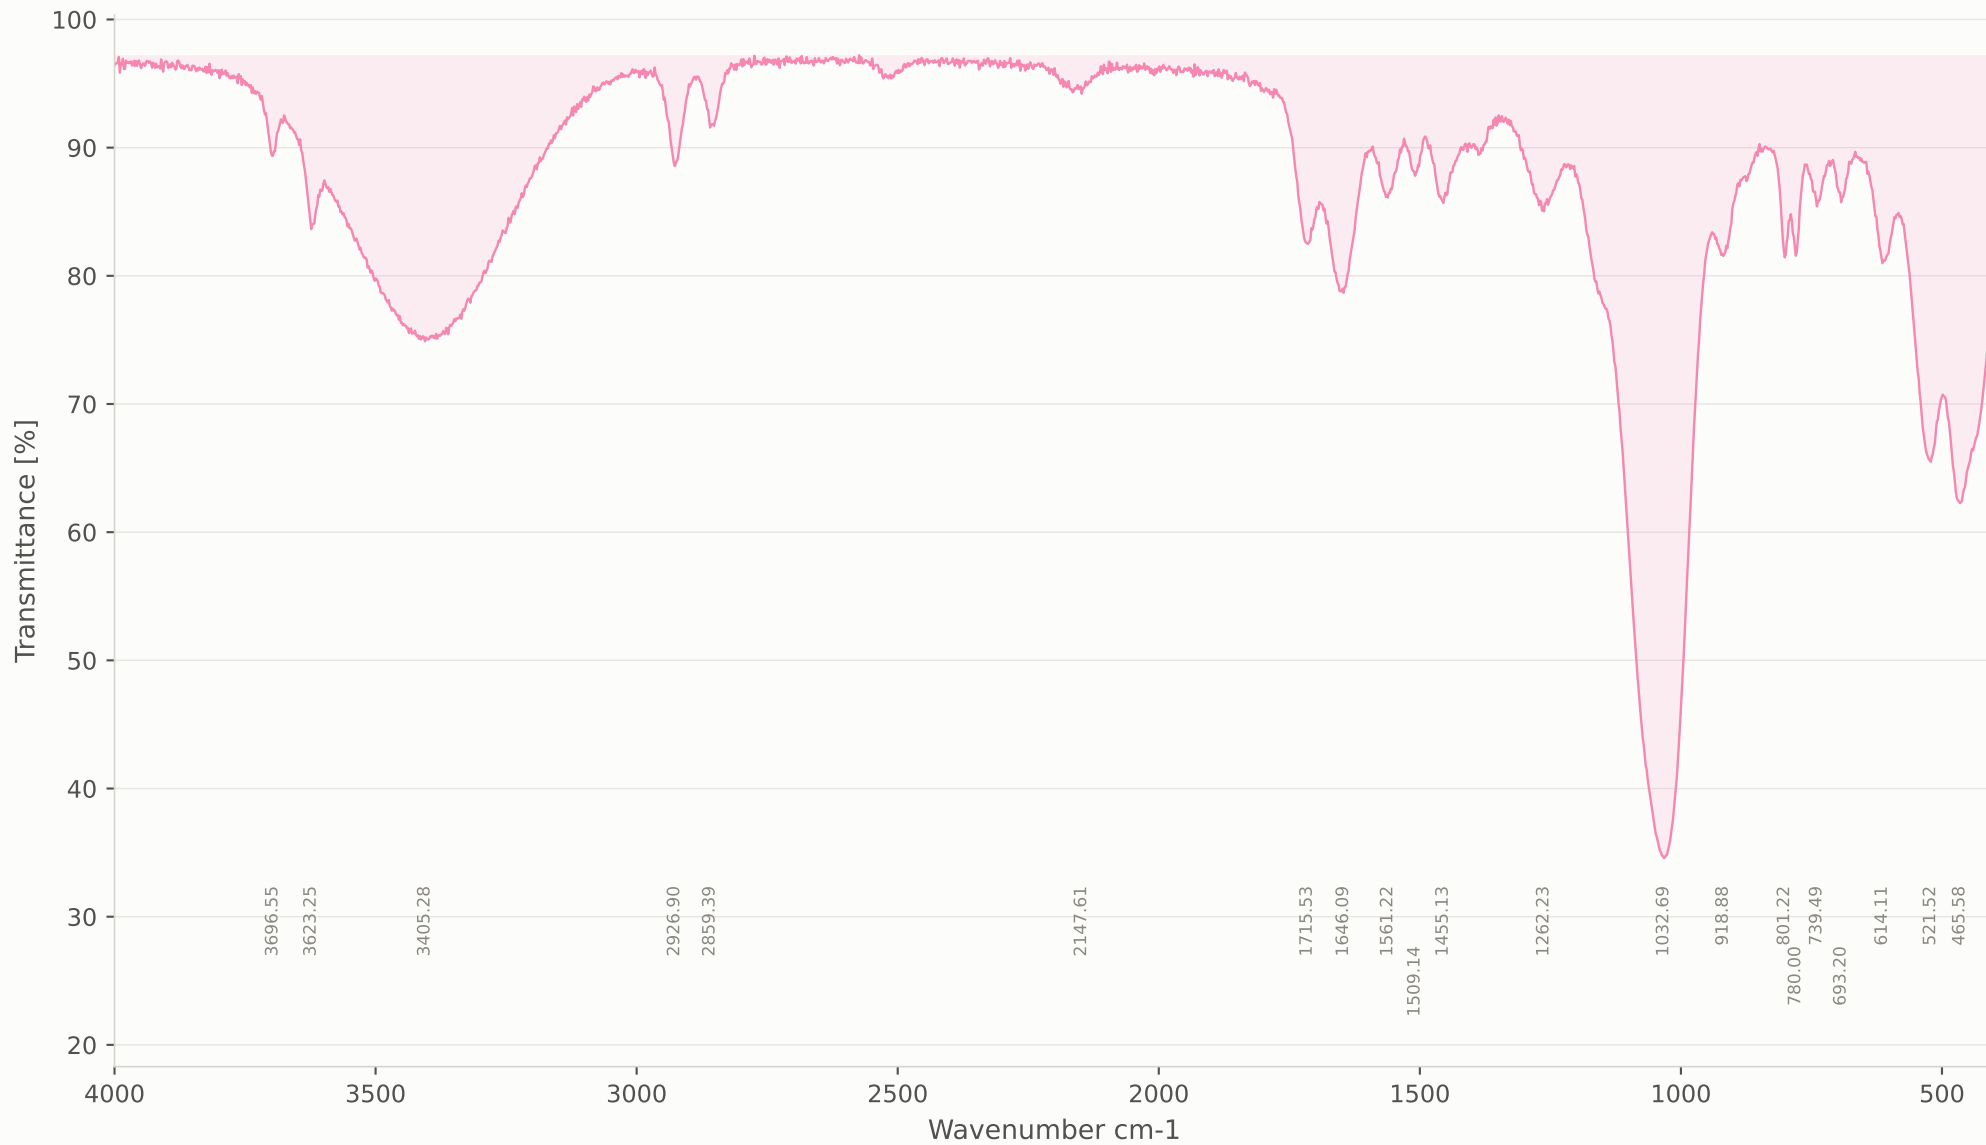

Simulated spectrum - generated from the band model in src/band_model.py. Not measured data.

Apple orchard | 15-30 cm | soil FTIR (simulated)

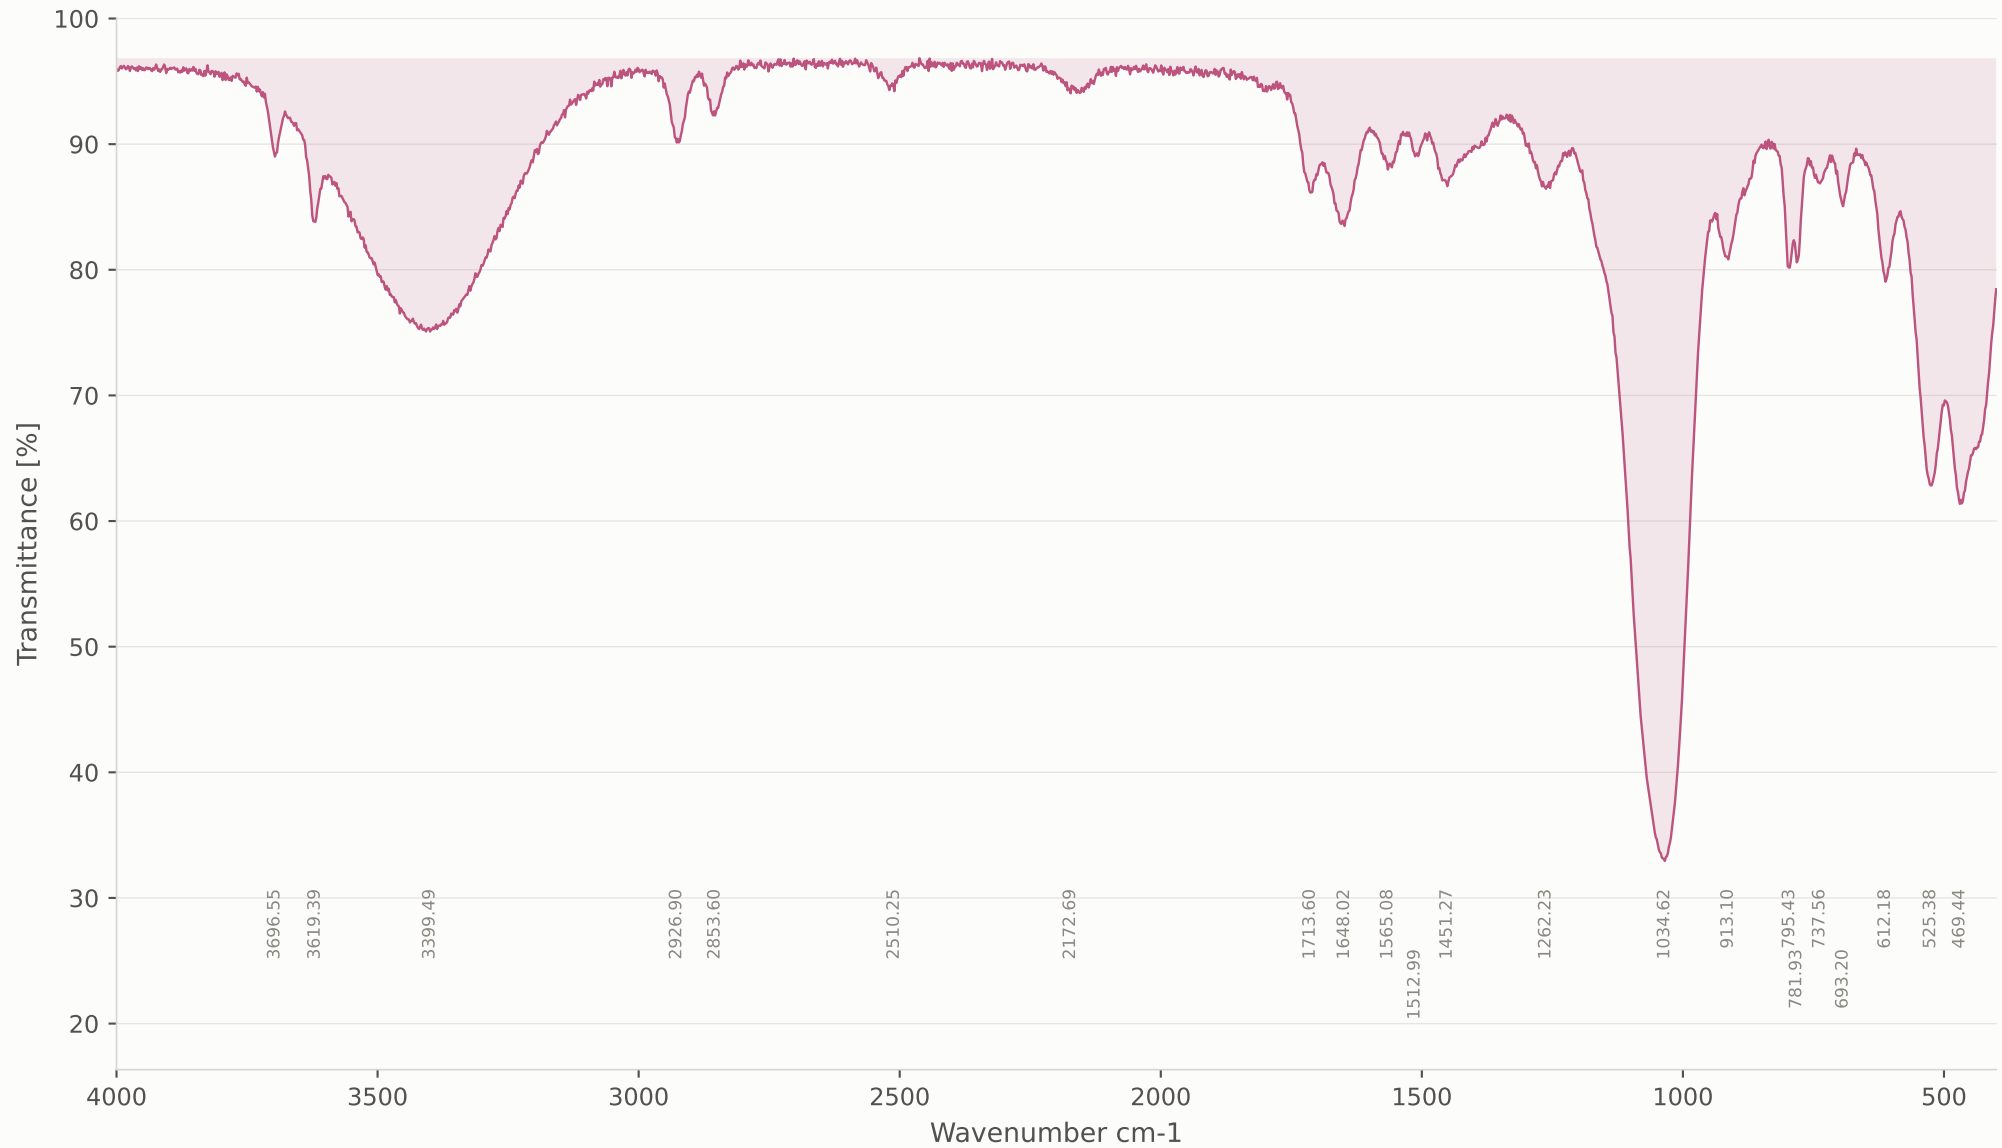

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Paddy field | 0-15 cm | soil FTIR (simulated)

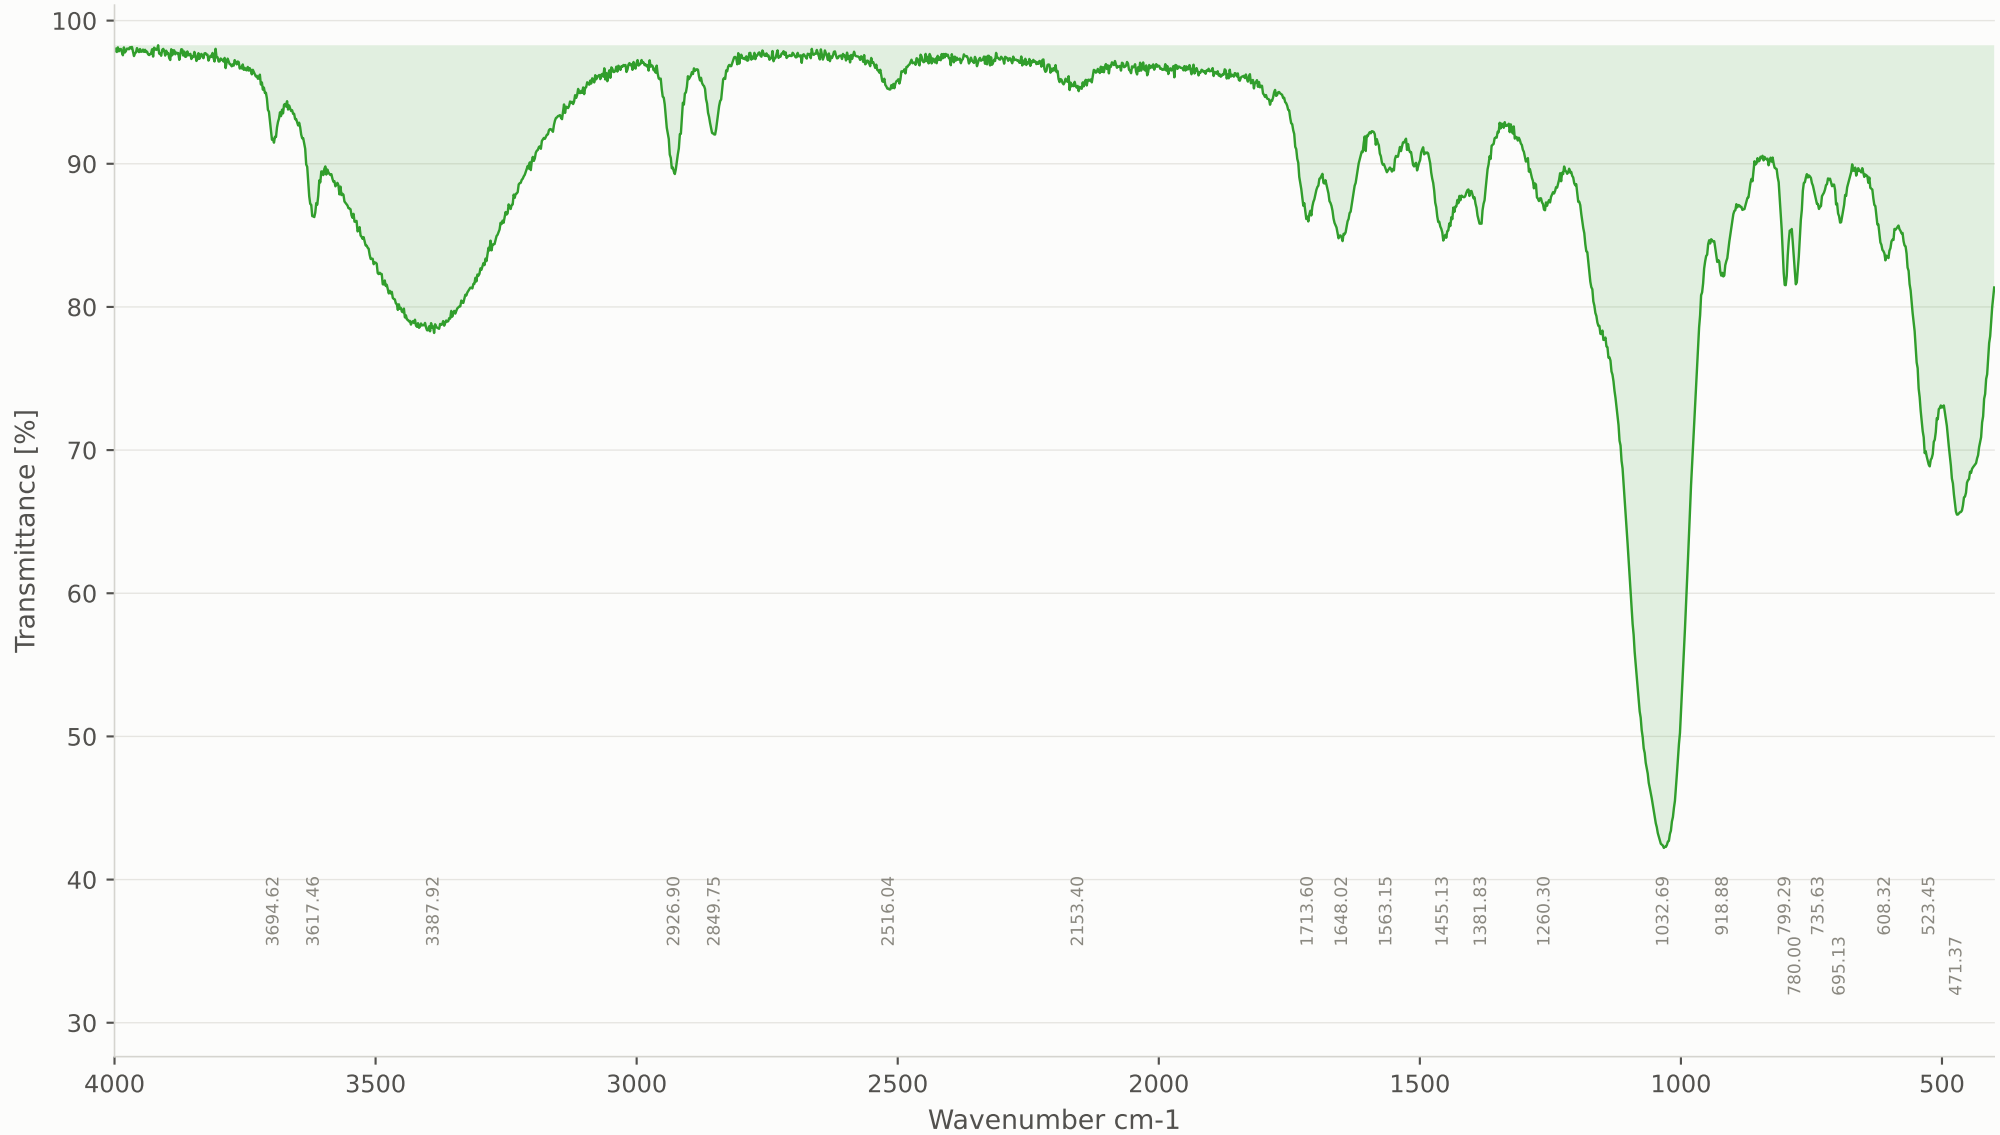

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Paddy field | 15-30 cm | soil FTIR (simulated)

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Maize field | 0-15 cm | soil FTIR (simulated)

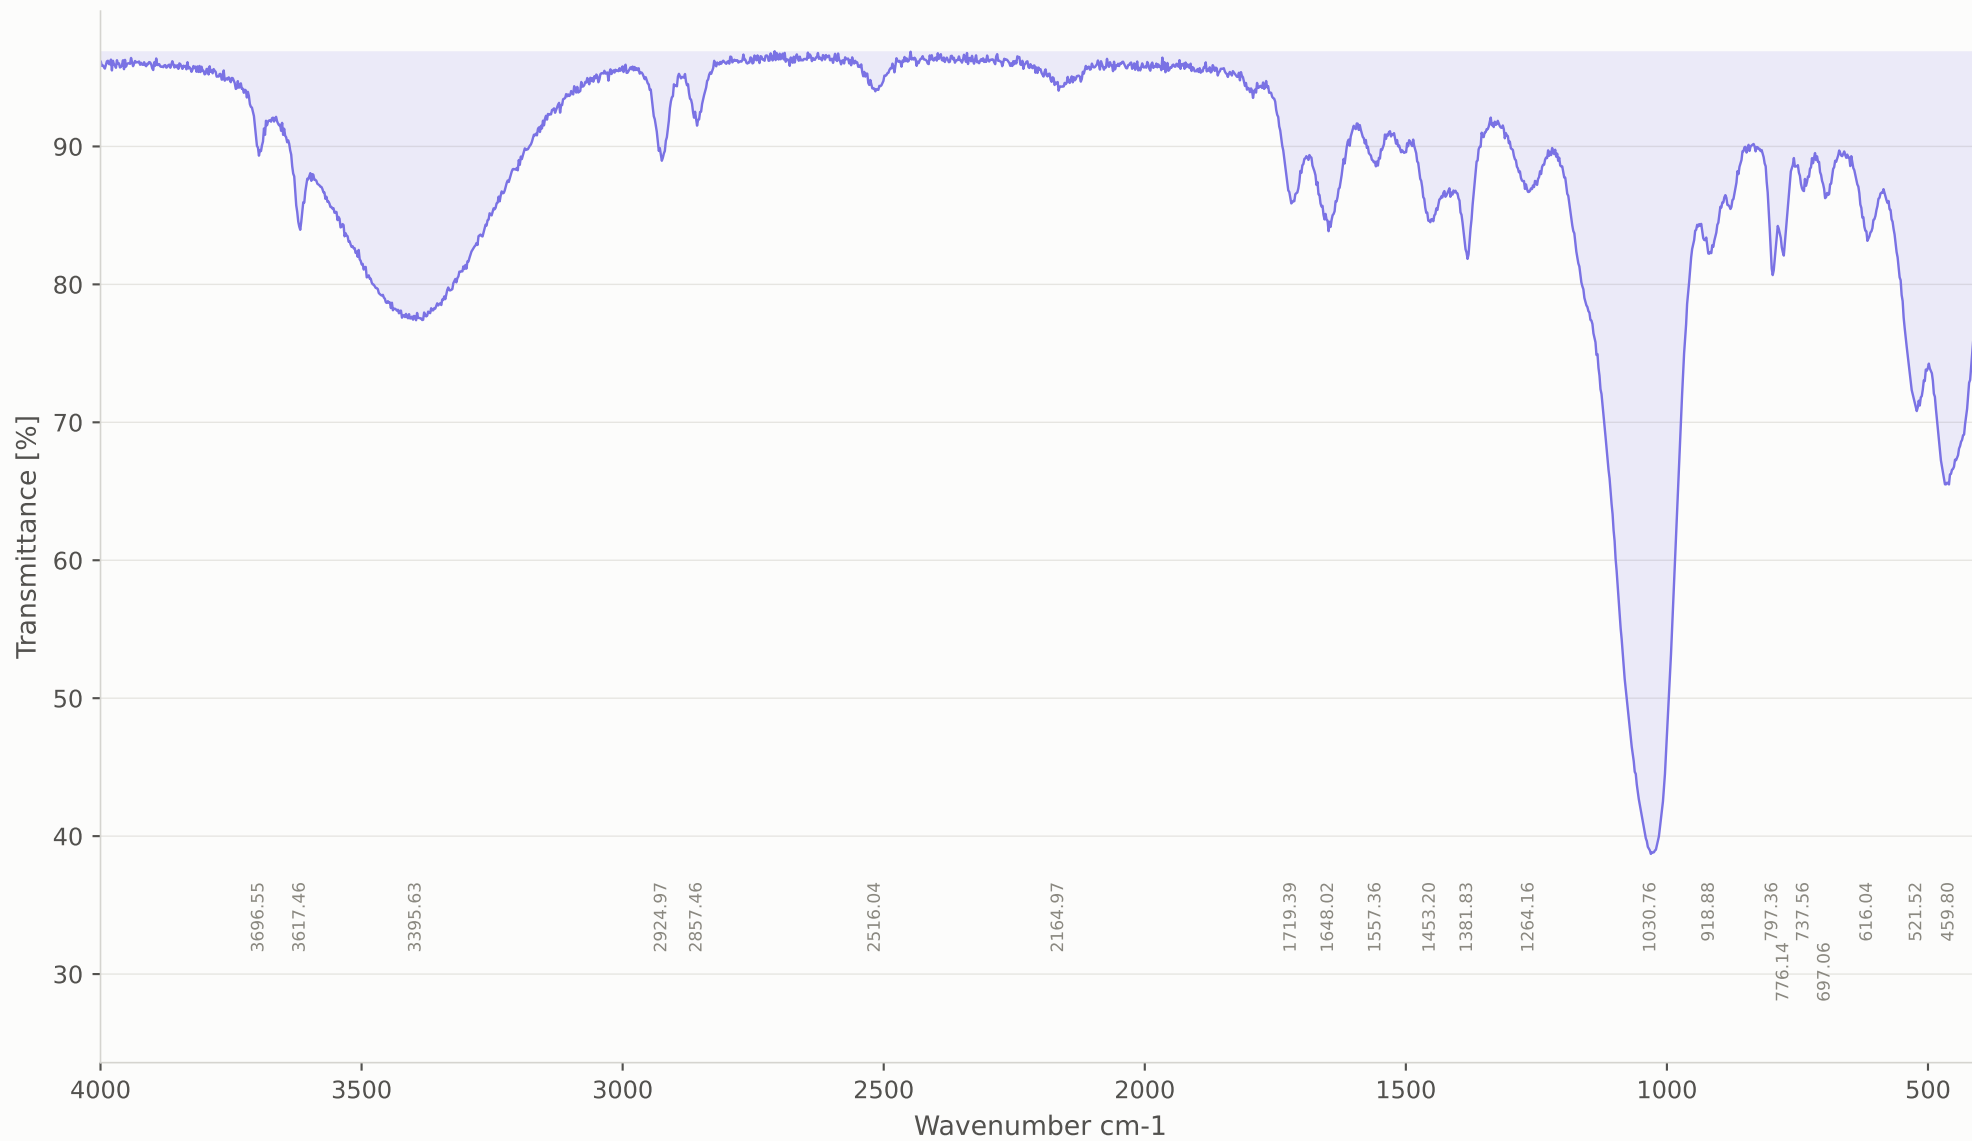

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Maize field | 15-30 cm | soil FTIR (simulated)

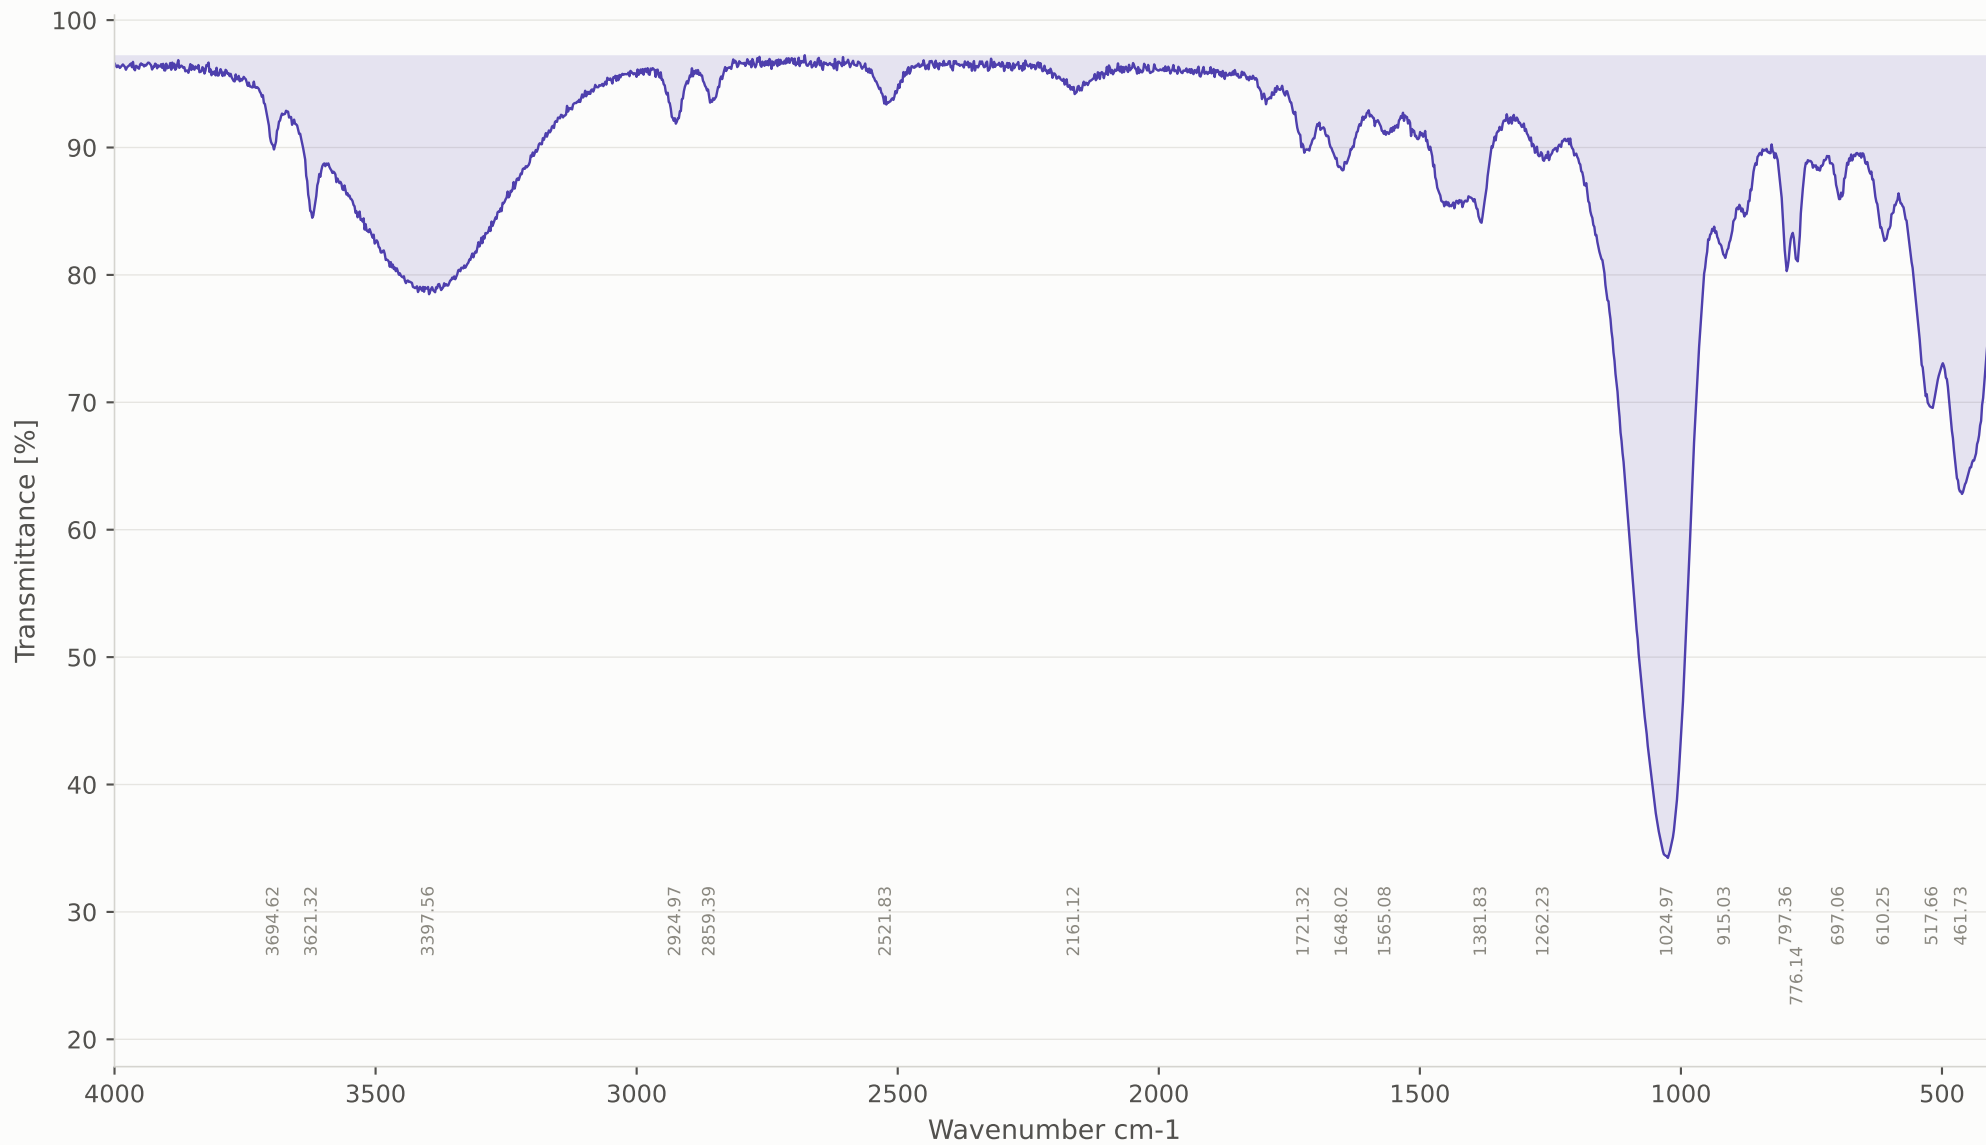

Simulated spectrum - generated from the band model in src/band_model.py. Not measured data.

Vegetable field | 0-15 cm | soil FTIR (simulated)

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.

Vegetable field | 15-30 cm | soil FTIR (simulated)

Simulated spectrum - generated from the band model in `src/band_model.py`. Not measured data.
